

HANGING FENCE RACK INSTALLATION TIPS

Thank you for your purchase...

Thank you for purchasing the Hanging Fence Rack. Our Hanging Fence Rack was initially designed for wrought iron fences but can be adapted to wood, vinyl, and other style fences. Our design philosophy was to allow our Customers the ability to hang inflatable as well as solid, vinyl covered foam floats and certain pool equipment poles, backwash hoses, etc. It also allows for ease of moving from various parts of your fence with relative ease.

We thank you for your purchase. Happy floating!

What's in the box...

- Installation Tips brochure
- 1 Pair of assembled Hanging Fence Rack posts.
- 4 tie down straps—optional but recommended

Installation Tips

Your new Hanging Fence Rack comes completely glued and assembled. The only thing necessary is for you to find a space wide enough to hang each “post” with room to store the size pool floats you have.

The clip at the bottom of each post should easily fit most wrought iron fences. If you’re going to use on a different fence type, you may want to remove these clips.

Four “Tie Down” straps have been included to better secure the top and bottom of each post to keep it from moving.

Please feel free to call if you have any questions.
